

What I love About Fremont County

By Runae Smith

Fremont County fun or boring? I think it is a fun and wonderful place, but I'm not going to get into all of the details about Fremont County. I'm going to talk about Island park and why Island park is what I love about Fremont County.

Island Park has many wonderful and glorious things about it. Its wildlife, lakes and beautiful scenery are a special part of Fremont County. Unlike other parts of Fremont County Island park has a talent, and that talent is drawing people to it. Whether it's hunting, fishing, boating or swimming you can spend time doing these things with your family in Island Park.

My grandparents live in Island Park, on Bills Island. We go there every summer to spend time with them. Other relatives and friends visit and spend time there with us. We do many fun things together.

I enjoy the wildlife in Island Park. That is part of what makes Island park what it is. The wildlife helps draw tourists. The lakes, mountains, and places to camp also attract many people to Island Park. People love to go to Island Park to swim, water-ski, ride 4-wheelers, camp, hike, boat, and fish during the summer. Winter activities include, skiing, snowmobiling, sledding, and ice fishing.

Island Park is built on a caldera. The caldera was made by an eruption of a volcano many thousands of years ago. Island Park starts on Ashton hill and goes into Montana.

Island Park has many wonderful residents that are really pleasant and fun to be around. I think these things make Island park unique. These are the things that I love about Island Park, in Fremont County.
