

Planning & Zoning: Administrator Rodney Eastvold and Rick Byrem met with the commissioners and requested approval on the final plat for Lewis Webster, Webster's Lakeview Homesites. Commissioner reviewed plat and then approved.

Landfill Ordinance: Commissioner Bill Baxter made a motion to adopt ordinance 94-02 on illegal dumping. Ordinance provides that it is unlawful to discard solid waste on public or private lands except as authorized and that if a person is identified as an addressee or owner of any article found in the garbage illegally dumped, they will be considered responsible for the garbage and may be assessed all costs to clean area. Commissioner Chandler seconded the motion, motion carried.

EMS: Coordinator Mary Lou Davis and Island Park QRU representative Mary Barker requested the commissioners replace the 1979 suburban used by QRU responders. The Island Park QRU unit would fund \$5000 toward the replacement cost estimated at \$27,500. Commissioners agreed to advertise and bid for a unit to replace the old vehicle and requested Davis to formulate specs.

Treasurer Report: Treasurer Patricia McCoy reported to commissioners on an increase of Last Chance sewer fees to \$126.00 which is up 5% over previous charge as per their board. Commissioners decided to charge the users outside of the district including Buffalo/Hatch additions and Ponds the same fee.

Cancellation totaling \$569.78 were made for the month of September which were approved by the commissioners. McCoy is in process of notifying sellers of timber products on the yield tax. A special weed fee of \$28.80 will be placed on Bruce Hill's tax notice.

Forest Service: Jack Harden from the Island Park Ranger District requested commissioners review the Forest Service billing for the sewer systems for Buffalo and Flatrock campgrounds. Commissioners asked that the Forest Service submit an agreement on the base hourly rate and they would review.

Harden questioned need to renew the landfill dump permit and suggested that there be a dumpster placed outside of the gate for after hour use. Parking places for winter use were discussed.

Sewer Systems: Supervisor Jay Killmer reported that the land application permit from DEQ is for 15 ml gallons annually and that the Island Park system has grown and needs updated as we are currently as high as 30 ml gallons. Commissioners will consider seeing if additional sewer studies can be done concerning capacity and users.

The grinder pump by Henrys Fork Landing is recommended to be replaced with a 2-hsp pump as it trips the breaker when the grinder stops. The estimated usage for a restaurant is 6,000 to 8,000, pumps now 4,172. Commissioners suggested use of a septic tank and an alarm system.

Sawtell sub-division needs to be approved by DEQ and the county before it can be placed in the system. Killmer has been consulting with Forsgren Engineer John Milar. Commissioners instructed Killmer not to accept sub-division for hook up in the system until the blueprints of the collection lines have been approved for use.

There being no further business to come before this Board, Meeting was recessed until the next regularly scheduled meeting.

Dated at St. Anthony, Idaho, this eleventh day of October, 1994.
